Subject: Settlements For Microsoft

Dear Attorney General John Ashcroft:

Microsoft was a treasure of this country for the twenty century, and will also be for the next century. Without the Microsoft's high tech contributions during the last twenty years, this country could well be behind Japan, Britain in the competition of the computer technologies. Consumers benefit from the Microsoft's products.

The settlement between DOJ and Microsoft should be done as soon as possible. Otherwise, our economy will continue to suffer.

Those nine states want to continue litigation are not the public best interests nor good for the economy. They should also accept the terms of settlements that agree between DOJ and Microsoft.

Thank you for your time>

Sincerely,

Min Hue Lu
Computer Scientist
